Instagram Frueskov\_widfish\_big Open all year round, also when there is ice. We try to keep the lakes free of ice.

Frueskov Lystfiskersø lies in a lovely, tranquil area close to woodland and shore (Flensborg Fjord). The two lakes total 17,000 m<sup>2</sup>, and one of these is a children's lake with a depth of 4 metres; the other has a depth of 6 metres. Here various varieties of trout are put out 1-5 times daily, from 0.8-11 kg. The lakes are extremely well laid out and have many facilities, including covered seating/standing areas, benches, tables, barbecue area, play area for children, toilets and free use of fish-cleaning facilities. You can buy your angling permit at the lake's kiosk, which also sells food items as well as various types of fishing tackle. Apart from various varieties of trout, other species such as wild salmon, zander and eel are also put out. The lakes are maintained using biological agents. You can hire rods and we can freeze your catch for you. For a small charge, you can take a shower. Completely new indoor toilets with shower facilities for men, women and disabled persons. Fish-cleaning facility. Overnight stopovers possible, with electricity supply. If you wish a stopover elsewhere, we can help you arrange other forms of accommodation. There is a fish guarantee for the children's lake: ask at the kiosk is there is a fish guarantee in the children's lake 'today'. If you require other variants of, for example, rods/hours – just consult our rates at: [www.frueskov.dk](http://www.frueskov.dk) or phone 22414979.

Directions: from the Danish-German border crossing B200 at Kruså, take route 170. Drive approx. 5.6 km (direction Sønderborg). Turn right along Frueskovvej, drive approx. 200 m, turn right to get to Frueskov Lystfiskersø. From inside Denmark, take exit 74 (Kruså) of the E45 towards route 170/Flensborg N.
